

# E-flex

**It's similarity with other Inook models should not hide main innovations.**

- The orange translucent binding plate is made out a high quality material, slightly flexible and very resistant.
- The Pebax® Material provides the possibility of rolling out the foot without constraint. Shoes with soft soles can be used.
- The special attention offered to the sequined design.

ANTHRACITE GRAY  
RAQ 027035

998 g x 2 | 45 > 120 kg | 34 > 47

# E-move

This atypical model is definitively aimed to fanciers of performance and sensations. Its exclusive concept relies on three main innovations:

1160 g x 2 | 45 > 120 kg | 34 > 47

DUNHILL RED  
RAQ 060033

## Slope angle regulator

The laterally rotating central plate compensates the hill inclination. It tends towards the horizontal and supports a flat foot stance even during hill crossings. This ergonomical walking is joint friendly and gives a safe feeling.

## EF Ergonomic Frame

Asymmetrical frame to guarantee a uniform repartition of the pressure. The shape of our feet corresponds to the repartition of our body-weight on our feet. We have adapted the shape of the snowshoes to this essential element to ensure an even repartition of the body's weight on the snowshoe. Comfort and safety are improved.

## NS Natural Step

This double articulated joint enables the foot to roll-out naturally. The snowshoe is being pulled instead of lifted, it feels a lot lighter.
